PUBLICATIONS

Image Assisted Data Security Using Key Encrypted File

- In this paper a new technique for image-based data hiding with a binary file is proposed. In traditional methods the image based data hiding referred as steganography. The basic idea of Steganography is that it distributes the message uniformly throughout the image. But it will cause degradation to the image. Here concept of steganography is used to make text encryption

EDUCATION

BTech in Computer science and engineering TKMCE

05/2009 - 05/2013
